

CodeIT Enterprise™ - The Innovative Traceability Platform

Hardware brand-independent and fully customizable.

An integration-friendly, flexible and scalable solution for any or all of your existing and future production lines.

LEVERAGE YOUR DATA

LEVERAGE YOUR DATA

INNOVATION

CodeIT Enterprise™ is a unique, hardware brand-independent, fully customizable software platform = one flexible and scalable solution for any or all of your existing and future production lines. CodeIT puts you in control with full product traceability, unparalleled connectivity for extensive systems integration, and comprehensive shop-floor data management options. Our goal is to enable clients to leverage their data beyond labelling and marking, to generate value, drive growth, enhance production and productivity, and ensure success in demanding markets that are constantly changing. The freedom our production traceability platform gives, and its connectivity, flexibility, and scalability, put CodeIT clients ahead.

EXPERIENCE

CodeIT has strong roots in industrial software design, coding, marking, labeling, and production automation. We understand our clients' need for rapid deployment, and flexible and scalable systems. This understanding comes from many years of working with critical business applications and our extensive shop-floor experience. Our team is committed to enabling clients to leverage their data to the full, and secure full traceability to build strong brands and ensure transparency and compliance.

DEPENDABILITY

Forward-thinking manufacturers use CodeIT worldwide. We always work directly with our clients. At CodeIT we ensure our clients are always fully up-to-date and informed. We focus on ease of operation, world-class service, and lifetime support. We deliver the control needed to rapidly respond to market changes and new demands that often dictate fast turn-arounds, short runs, and pressure on profitability. Let CodeIT be your independent partner and single point of contact for all your production traceability and production data management needs.

Digitalization • Integration • Automation • Labelling • Marking • Monitoring • Reporting • Support 24/7

Areas where CodeIT excel:

1. Solving traceability

Food • Fish • Wood • Industry

2. Coding, marking, labelling, tagging, identification

- Raw Materials / Finished Goods
- Products / Parts / Individual Units / Bundles
- Packaging / Boxes / Cases
- Pallets

3. Core software and services

Platform License with Software Maintenance Agreement (SMA)

- Site
- National
- Global

4. Extended capabilities and data utilization

- Client / Site Services as add-ons to SMA
- Function Level Services 1 & 2 as add-ons to SMA

5. Rapid deployment and implementation

- CodeIT 10 Steps to Success

6. Lifetime support

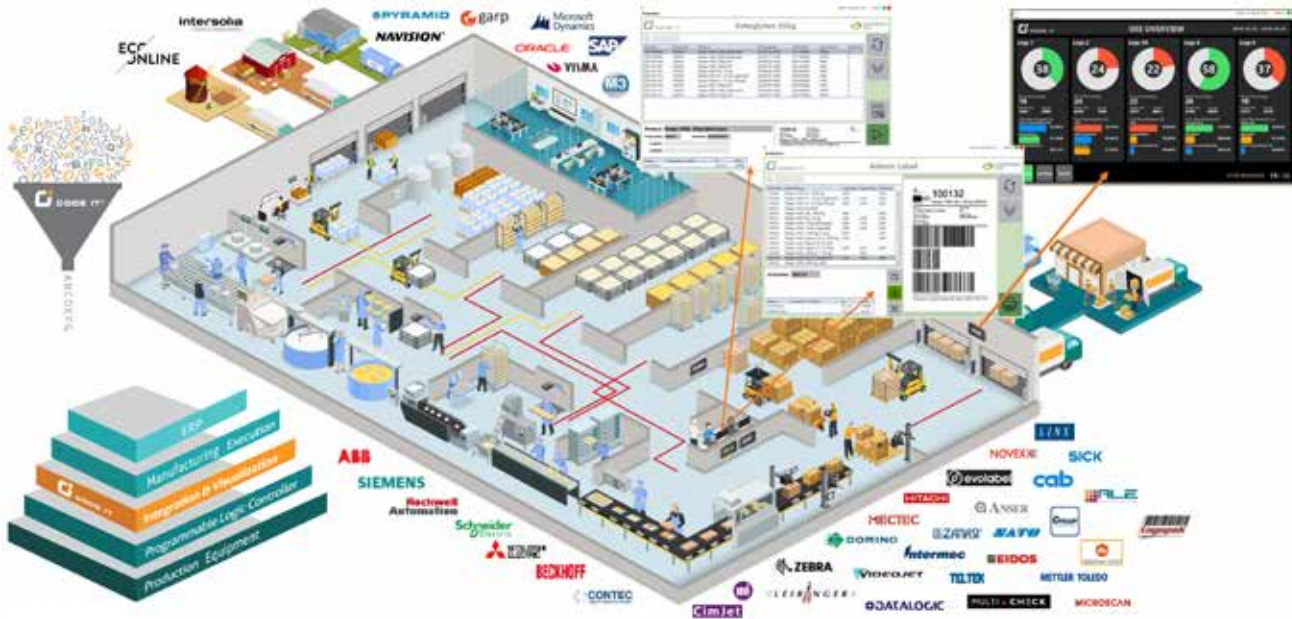

- CodeIT Support Centre (CSC)
- SLA - Service Level Agreement
- 24/7 - Round-the-clock Support
- TSA - Technical Support Agreement

7. Your independent partner and single point of contact for solving traceability

- Professional Services
- Hardware Procurement
- Consumables

CodeIT Enterprise™ - The unique, integration-friendly, hardware brand-independent, fully configurable solution.

The illustration shows some of the brands you may be using. The unique CodeIT hardware brand-independent approach enables you to use most production equipment and to integrate with most business systems. Contact us for an independent assessment of how you may better utilize your existing systems and equipment using CodeIT.

CodeIT puts you in control with full product traceability, unparalleled connectivity for optimal systems integration, and comprehensive shop-floor data management options that include:

- Automatic coding, marking, labeling, and identification of products or parts, packaging, and pallets, with real-time and variable production information, anywhere in the production flow from raw materials first arrive until finished goods leave.
- Extended data utilization to enhance overall production and warehouse efficiency.
- Data Capture. Data Monitoring. Real-Time Reporting, and more.
- Automation. Systems Integration. Digitalization. Rapid deployment and implementation

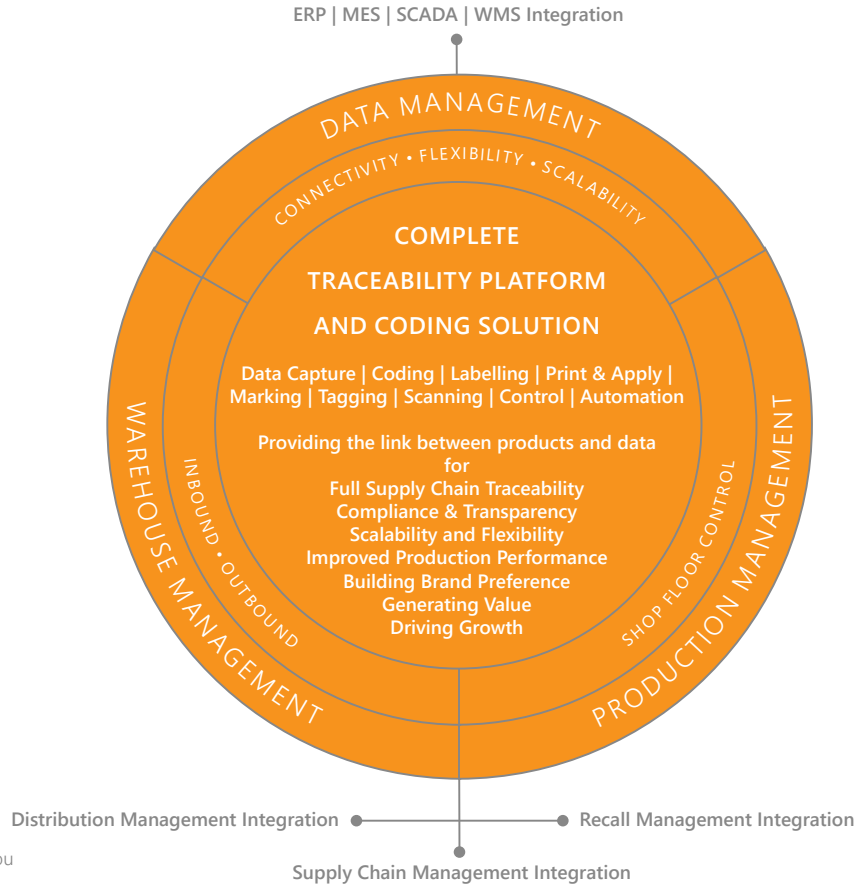

Let CodeIT be your independent partner and single point of contact for all your production traceability needs.

Leverage your data with CodeIT expertise, software, services, and support.

CodeIT Enterprise™ - The integration-friendly, innovative traceability platform and coding solution for any or all of your existing and future production lines

CodeIT puts you in control with full product traceability, unparalleled connectivity for optimal systems integration*, and comprehensive shop-floor data management options.

The unique CodeIT hardware brand-independent approach enables you to use most existing or new production equipment, printers, scanners, sensors, PLS, etc., irrespective of supplier, communication, technology, or age*.

* Contact us for an independent assessment of how you may better utilize existing resources using CodeIT.

CodeIT Enterprise™ - Extended capabilities and data utilization

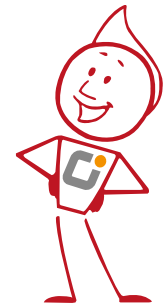

Unlike other labelling and marking systems, the unique and versatile architecture of the innovative CodeIT Enterprise™ Traceability Platform enables you to leverage your data and do more than labelling and marking. With CodeIT Enterprise™ you can leverage the data created and used as part of product coding and traceability to enhance many areas of production efficiency and profitability.

- CodeIT LegalPrint Scale Services
- Data Monitoring Services & OEE Reporting
- Order Management Services
- Recipe Management Services
- Smart Palletizing Services
- Smart Warehousing Services

Our core software and services can be configured and customized on-site to meet most operational and individual client needs. However, sometimes a client may have a special or unique need and might be looking for something more. We have an experienced team of consultants and software developers that can help. They can suggest ways to use our core software and services in unique ways without alteration, or they may find it appropriate to modify features or implement new ones in our core software. You can regard our engineers as part of your team.

We love challenges! Why not try us?

CodeIT - the innovative Nordic labelling, marking, and traceability experts, that do more.

We believe we have one of the best support programs in our industry. We designed it to help CodeIT clients be more efficient and effective. It is truly a program that adds value and keeps costs down.
