

## Quality Manager, CodeIT Group

### **About the company:**

CodeIT Group is a leading provider of innovative industrial software solutions, dedicated to helping manufacturing industries around the world make efficient use of their data. We strive to deliver products and services of the highest quality and reliability.

We focus on two main areas: labeling, traceability and process automation in production environments and information management solutions for the oil and gas industry. With offices in Gothenburg and Oslo and a development center in Ho Chi Minh City, we serve customers in over 20 countries.

We are now looking for a dedicated and experienced Quality Manager who can ensure that our high standards are maintained. As Quality Manager, you will be responsible for ensuring that all products and services meet the highest standards of quality and reliability. The role involves implementing and maintaining quality assurance processes across different departments within the company.

Based in Gothenburg, you will be part of our growing global team of over 70 colleagues worldwide.

### **Responsibilities:**

- Develop and implement quality management policies and procedures to ensure product and service quality meets company standards.
- Design and implement quality control processes throughout the software development cycle.
- Collaborate with other functions in the company to define quality metrics, KPIs and testing strategies.
- Conduct regular quality audits to identify areas for improvement and implement corrective actions.

- Lead quality management teams to promote a culture of continuous improvement.
- Establish and maintain documentation related to quality standards, processes and procedures.
- Analyze data to identify trends and insights that drive quality improvements.
- Stay up to date with industry best practices and advances in quality management practices.
- Act as a link between different departments to ensure consistency around quality objectives.

**Qualifications:**

- Experience in quality management in software development or similar areas.
- Strong analytical skills and experience in data analysis
- Excellent leadership and communication skills
- Ability to work independently and in teams
- Knowledge of current quality standards and methodologies.
- Fluency in spoken and written Swedish and English.

**How to apply:**

Send your application and CV to Christian Öhrn [info@codeitab.se](mailto:info@codeitab.se) by 2024-10-31
